Card Defender Diamond

Available branded with your logo or security message

## Introduction

The growth of contactless cards has seen an increase in fraudulent payments. Criminals are utilising card readers to take £30 one off transactions with the wave and pay system. Whilst other thieves are 'skimming' cards to steal bank details.

The Card Defender Diamond is the ultimate RFID blocking solution that will protect contactless cards within a 10cm radius from skimming material. Eliminating the need for multiple individual card holders.

- Police Preferred Specification
- Combats fraud & identity theft
- Convenient defence
- Branding options available
